PYTHON REKOR MONITOR
Security and Testing Evidence

Repository: at7282/at7282-assignment1
Generated: 2026-10-19

Contents

1. TruffleHog detects and blocks a staged secret
2. pytest test suite and coverage report
3. Branch protection rule for main

These pages are terminal captures of the commands used to produce the requested evidence. To capture equivalent screenshots, run the commands in docs/REPRODUCING-EVIDENCE.md and capture the terminal window.

Section 1 uses a synthetic AWS credential and --no-verification.
Section 2 shows 67 passing tests and 95.98% line coverage.
Section 3 reads the live branch protection configuration from GitHub.

```
================================================================================
1. TruffleHog detects and blocks a staged secret
================================================================================

Source: docs/evidence/1-trufflehog-secret-detection.txt

Note: the synthetic AWS access key is redacted in this capture.

Command: git commit -m "Add fake credential" (with leak-test.txt staged)

[WARNING] Unstaged files detected.
[INFO] Stashing unstaged files to /home/andy/.cache/pre-commit/patch1792466566-12666.
TruffleHog (staged changes only).....................................Failed
- hook id: trufflehog-staged
- exit code: 183

???  TruffleHog. Unearth your secrets. ???

2026-10-19T23:22:48-04:00    info-0    trufflehog    running source
{"source_manager_worker_id": "nM4UJ", "with_units": true}
Found unverified result ???
Detector Type: AWS
Decoder Type: PLAIN
Raw result: AKIA****************
Resource_type: Access key
File: /tmp/trufflehog-staged-waikj0t8/leak-test.txt
